ChatD&B

Accelerate and simplify your business decisions with Generative AI

There are two options when it comes to Generative AI: Invest now or race to catch up later. AI is the revolutionary powerhouse that will drive our business future but if you aren't prepared to spearhead development on your own, there is a lot to consider when selecting external solutions. A foundation of trusted, continuously updated data can help you prevent AI hallucinations, improve output reliability, eliminate bias, and accelerate innovation.

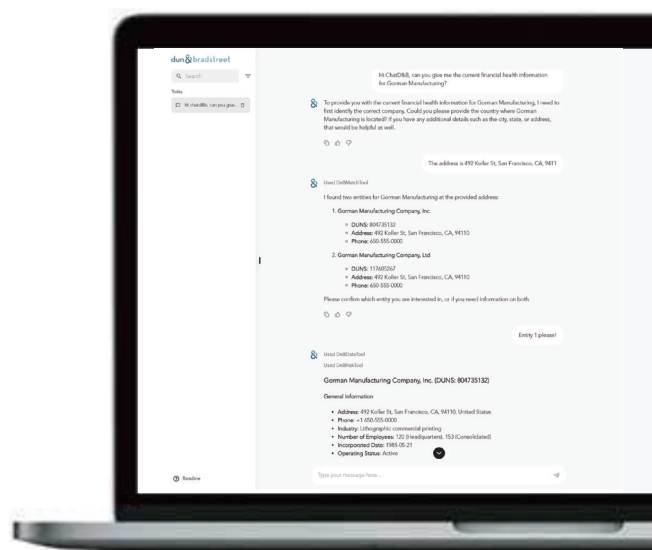

Solution

ChatD&B is Dun & Bradstreet's enterprise generative AI advisor designed to accelerate and simplify your business decisions and improve your productivity.

It uses the power of Dun & Bradstreet's trusted data and its patent-pending autonomous AI agents technology to assist you with company insights across numerous enterprise domains. Whether you're looking for specific company information or industry-wide data, ChatD&B can help you quickly generate the insights you need.

Leveraging ChatD&B within your research and decision making process helps increase productivity, make confident business decisions, and stay one step ahead of the competition by accessing trusted data quickly and efficiently.

ChatD&B responds to prompts using firmographics and analytics within your entitled Data Blocks subscription. Data Blocks empower clients to easily ingest world-class data they require across their enterprise in a consistent and scalable manner via API, flat files, or a combination. Data Blocks are licensed by domain: Sales & Marketing, Finance, Supply, and Compliance.

ChatD&B Helps You To:

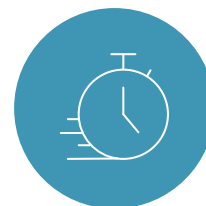

Explore Your Data

Discover new use cases for your data sets organically through your own natural language queries of ChatD&B.

Gain Confidence

Feel confident in unlocking new insights and investigating data elements you may not have used before.

Find Results Fast

Streamline research processes and workflows, improving efficiency and helping your team do more with less.

Powered by Data Blocks

GenAI technology is only as good as the data and insights that feeds it. Many know the phrase “garbage in, garbage out” to describe this nature.

ChatD&B is powered by firmographics, corporate linkages, financial and operational risk indicators, financials and payments data, and key contacts on over 600 million entities around the globe from the Dun & Bradstreet Data Cloud.

D&B Approach to AI

Dun & Bradstreet is committed to developing responsible AI solutions that accelerate innovation, improve efficiency, and contribute to sustainable growth.

ChatD&B allows you to ask question and get answers quickly, such as:

	D-U-N-S® Number	What is the D-U-N-S® Number for Gorman Manufacturing?
	ESG Insights	What is the ESG score for this company and how is that score calculated?
	Company Information	What industries does this company operate in?
	Principals & Contacts	Can you provide the contact info for the CEO of this company?
	Financial Strength Insights	Can you give me an overview of the current financial health of this company?
	Chat with Documents	Can you explain what scores and analytics Dun & Bradstreet used in this response?
